

# 11740 - A variability survey of temperate brown dwarf atmospheres

Cycle: 5, Proposal Category: SURVEY

## INVESTIGATORS

| <i>Name</i>                                   | <i>Institution</i>                                      |
|-----------------------------------------------|---------------------------------------------------------|
| <b>Dr. Beth Biller (PI) (ESA Member)</b>      | <b>University of Edinburgh, Institute for Astronomy</b> |
| Dr. Johanna Vos (CoI) (ESA Member) (CoPI)     | Trinity College Dublin                                  |
| Dr. Yifan Zhou (CoI) (CoPI) (US Admin CoI)    | The University of Virginia                              |
| Dr. Allison McCarthy (CoI)                    | Boston University                                       |
| Dr. Beatriz Campos Estrada (CoI) (ESA Member) | Max Planck Institute for Astronomy                      |
| Dr. Ben Sutcliffe (CoI) (ESA Member)          | University of Edinburgh, Institute for Astronomy        |
| Dr. Clemence Fontanive (CoI) (ESA Member)     | University of Edinburgh, Institute for Astronomy        |
| Dr. Elena Manjavacas (CoI) (ESA Member)       | Space Telescope Science Institute - ESA - JWST          |
| Dr. Elspeth Kim Huan Lee (CoI) (ESA Member)   | University of Bern                                      |
| Dr. Genaro Suarez (CoI)                       | American Museum of Natural History                      |
| Dr. Ian Crossfield (CoI)                      | University of Kansas Center for Research, Inc.          |
| Dr. Jacqueline Kelly Faherty (CoI)            | American Museum of Natural History                      |
| Dr. Michael C. Cushing (CoI)                  | University of Toledo                                    |
| Natalia Oliveros-Gomez (CoI)                  | The Johns Hopkins University                            |
| Dr. Niall Whiteford (CoI)                     | American Museum of Natural History                      |
| Dr. Samuel Aaron Beiler (CoI) (ESA Member)    | Trinity College Dublin                                  |
| Dr. Xianyu Tan (CoI)                          | Shanghai Jiao Tong University                           |
| Ms. Xueqing Chen (CoI) (ESA Member)           | University of Edinburgh, Institute for Astronomy        |
| Dr. Zhoujian Zhang (CoI)                      | University of Rochester                                 |
| Dr. Trent J. Dupuy (CoI) (ESA Member)         | University of Edinburgh, Institute for Astronomy        |

## OBSERVATIONS

## ABSTRACT

Late T (Teff~500-700 K) and Y (Teff<500 K) brown dwarfs are close analogs to mature, temperate giant planets like Eps Indi Ab and 14 Her c. Understanding their atmospheric dynamics through spectroscopic monitoring would directly inform our interpretation of similar temperature exoplanets, for which high brightness contrast prevents precise observations. JWST is the first facility with the sensitivity to probe the variability and weather properties of these faint, cold brown dwarfs. We propose a 130-target survey-mode NIRSPEC BOTS variability monitoring study of isolated T8-9 and Y dwarfs. Only one late T and one Y dwarf have been monitored with JWST; this will be the first systematic search for variability in cold brown dwarfs, which will yield:

1. The first measurement of variability occurrence rate for cold atmospheres shaped by sulfide and water vapor clouds. Measuring variability occurrence rate is critical for robust atmospheric modeling, as it provides insight into the homogeneity of atmospheric structures. For example, classes of objects with patchy clouds will have a high variability occurrence rate while classes with no or uniform cloud cover will not.
2. Characterization of 3D atmospheric structure for objects with detected variability, thanks to the wide wavelength range covered by these observations
3. In-depth spectral retrieval studies for all targets observed based on the high S/N spectra obtained, even in the case of a null variability detection. Retrieval studies will reveal detailed atmospheric structure, including cloud properties, abundances and thermal profiles. Even a single survey observation will deliver publishable results.

## **OBSERVING DESCRIPTION**

We request 130 targets for this SURVEY mode program. Targets are T8-T9 and Y dwarfs with WISE2 mag  $\leq 16.0$ .

We request  $\sim 2$  hours of charged time per target, which corresponds to  $\sim 1$  hour of variability monitoring. This is similar to the 1.59 - 1.93 hour-long survey mode observations conducted in Cycle 3. We will obtain PRISM spectra in NIRSpec BOTS mode, with the SUB512 subarray and NRS readout mode. 300 groups will yield  $S/N > 100$  at 4 microns in single wavelength bins for objects with WISE2 magnitudes  $< 16$  and late T and Y dwarf spectra, with a base cadence of 271 s / 4.5 minutes. This will obtain 12 samples in  $\sim 1$  hour of observation. To improve  $S/N$ , we will sum over several wavelength bins, ensuring sensitivity to variations  $\geq 0.5\%$  over an hour of observing time. Compared to L and early/mid-Ts, late T and Y dwarf spectra are highly absorbed, with a broad peak between 4-5 microns, and a secondary peak of emission between water absorption features at 1.1 micron and 1.45 micron. Using the ETC, for targets where we achieve  $S/N > 150$  in single wavelength bins between 4-5 micron, we reach  $S/N > 100$  in the secondary peak.

# Proposal 11740 - Targets - A variability survey of temperate brown dwarf atmospheres

| Fixed Targets | #                                                                                                                           | Name                       | Target Coordinates                                                                  | Targ.
